

SK CU4-REL-POW

Part number: 275 271 012

Setpoint converter

NOTICE

Validity of this document

This document is only valid in combination with the operating instructions for the relevant electronic drive technology and under strict compliance with the safety and warning instructions which they contain. Safe commissioning of this module and the electronic drive technology depends on the availability of this information.

Scope of supply

| | | |
|-----|---|-----------------------------|
| 1 x | Module | SK CU4-REL-POW |
| 1 x | Cable set for digital signals | black / white / blue |
| 1 x | Cable set for 24 VDC + analogue signals | brown / blue / grey / green |
| 1 x | Connection cable (10 V reference voltage) | red |
| 2 x | Connecting screws | M4 x 20, cross-head |

Field of use

Setpoint converter unit for use in a decentralised electronic drive technology frequency inverter. This module enables the conversion of bipolar signals into unipolar analogue signals. With the aid of digital signals it is also possible to control the coupling relays which are integrated into the module. The coupling relays are implemented as converters.

One potential level is useable for all analogue and digital signals together.

Function description

The module must be supplied with 24 VDC.

Analogue signals:

Bipolar analogue signals (-10 V ... +10 V) must be connected to the input terminals of the module. The signal which are converted to 0...10 V must be obtained from the analogue outputs and connected to a frequency inverter. In order to ensure the function of the analogue signal converter, the 10 VDC reference voltage of the frequency inverter must be wired to the reference potential of the setpoint source(s) of the module.

Digital signals:

Two coupling relays are integrated into the module. These are controlled via the digital outputs of the frequency inverter and can be used as openers (NC) or closers (NO) according to their connection.

| Technical Information / Datasheet | SK CU4-REL-POW | | | |

Setpoint converter – SK CU4-REL-POW

Technical data

| | |
|-------------------|-----------------|
| Temperature range | -25°C ... 50 °C |
| Temperature class | Class 3K3 |

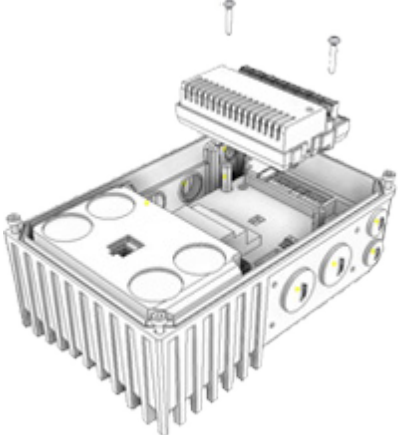

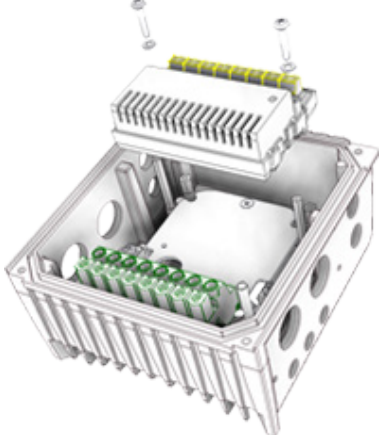

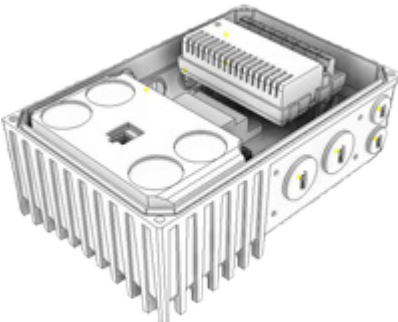

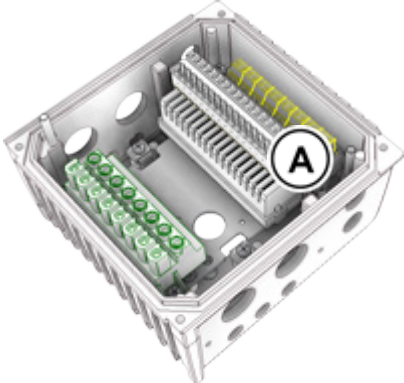

| | |
|----------------------|------|
| Vibration resistance | 3M7 |
| Protection class | IP20 |

For details of the electrical data please refer to the descriptions of the connections (📖 Section "Control terminal details").

Installation

| | |
|-----------------------|---|
| Installation location | In defined option slot inside the frequency inverter (SK 1xxE, 2xxE). |
| Fastening | with screw fastenings |

Installation steps

| | SK 1xxE | SK 2xxE *) |
|----|---|--|
| 1. |  |  |
| 2. |  |  |

*) Before carrying out installation step 1 it may be necessary to remove the control terminal bar (A),
The control terminal bar (A) must be fitted after installation step 2.

Connections

| | | |
|---------------------|-----------------|--|
| Terminals | Screw terminals | 1 terminal bar with 16 connections, (5 mm spacing) |
| Cable cross section | 0.14...2.5 mm | AWG 14-26 |
| PE connection | Via device | Via screws for installation in the device |

Control terminal details

Labelling, function

| | | | |
|----------|---------------------------------|------|---------------|
| 10V REF: | Reference voltage (input) | DIN: | Digital input |
| 24 V: | Control voltage (input) | R: | Relay |
| AGND/0V: | Reference potential for signals | | |
